There are some assumptions for this assignment:

1. The name of each driver is separated into first name and last name.

2. There is only one training course with the same training code that was completed on one date.

3. The identification of Chef De Mission in OFFICIAL can be achieved if the datatype of official_chef_de_mission is boolean.

4. The DRIVER TRAINING entity contains a record of all training modules completed by each driver, including the date of completion.

5. The TRIP entity contains each trip.

6. There is only one trip with the same pickup date & time and same drop-off date & time.
